

# Maison rouge

The five spacious and elegant rooms of **Maison rouge** are overlooking the outstanding mountains of la Sainte-Beaume. Nested in a protected forest and preserved area, **Maison rouge**, unlike any other dwelling of the area was made in 2004 according to the demanding quality standards of a highly qualified team of carpenters and artists out of three different types of wood : Italy poplar, Douglas and Red Cedar. Soft colours and natural scents, altogether with great comfort and delicious homemade breakfasts are part of the unique welcoming offered by Sylvie Coulomb. Five o'clock tea, à la Carte hiking tours, unlimited access to the impressive house library are part of this unique experience.
